Pipe Marker

Hazardous substances	Alkalis
Gas (liquid or gaseous)	Fire fighting medium
Liquids & solids (powder/granulate)	Water
Acids	Air

A solidly engineered system, designed to be hard wearing and up to the demands and conditions of Industrial environments.

Pipe marking according to ISO 20560-1 standard
To match its capabilities we have also developed an extensive range of materials for all performances and environments.

Customize Pipe Marker

A high adhesive, special laminated polyester which gives an outstanding long life length and temperature resistance, Ideal for pipe marking applications, Available as continuous tape and die-cut labels, Durability: average 7 to 10 years outdoor. Available in 9 colors and various sizes,

Pipe marking tape on a roll

Custom

For large projects, such as the layout of a new factory or building, our pre-printed pipe markings on rolls are an ideal means of saving costs and time.

Our pre-printed rolls are laminated against UV rays and chemical influences and are self-cleaning, flexible and water-repellent.

Arrow tape

Custom

You can emphasize and clarify the flow direction of a pipe using our arrow tapes.

The arrows tape comes in rolls and is available in various colors and sizes.

Valve Tags

Brass, Aluminum, Stainless Steel, Plastic and more!

Choose the valve tag that fits your unique specifications

Brass

Industrial standard brass will not bend or break.

Aluminum

Lightweight tags perfect for outside environments or in freezers

Stainless Steel

Extremely durable, corrosion and rust-resistant steel tags are perfect for your harshest environments

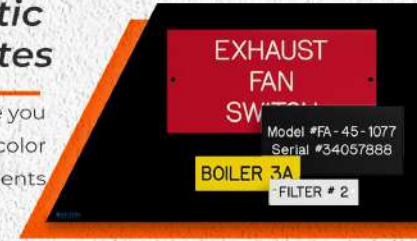

PVC Plastic

Ideal for color-coding valve markers with contrasting letters for quick identification

Custom Plastic Equipment Nameplates

Another tagging where you can customize the size and color base on your requirements

Custom Equipment Tags

Custom equipment tags make it easy for your team to keep track of all the assets in your facility

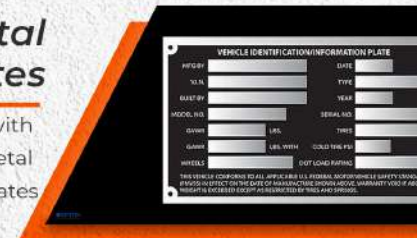

Blank Equipment Nameplates

Easily identify equipment, piping systems and more with blank equipment nameplates

Custom Metal Nameplates

Identify or brand your assets with vibrant and durable custom metal equipment nameplates

Equipment Nameplate

Durable equipment tags and nameplates for any application
Identify tools, machinery, office equipment, and other items with high-quality, customizable equipment tags and nameplates.

Floor Marking

The easiest, fastest, and most comprehensive floor marking system for industrial applications.

The combination of high durability and the wide range of colors and sizes, makes APEX the only complete floor marking system! APEX is very suitable for the implementation of the 5S System and Lean manufacturing

the best choice if you want your floor marking to be pre-printed. This floor marking will have your print on it and will be finished with a laminate top layer to protect your print from damages.

Order your floor marking with custom logo's, company names, images and more!

Shapes

This helps to organise the work place, increases safety and improves visibility. The APEX shapes are available in several colours and qualities.

Choose from:

Dots, Arrow, Pedestrians, T and X corners, Strips, Numbers/Letters and normal Corners.

Safety floor signs

You can choose from hundreds of razor sharp floor signs in several sizes and colours. You can also choose to get your custom floor sign produced by us.

ReGLO (photoluminescent)

A "glow in the dark" version, ReGLO. The APEX ReGLO series is ideal for indicating evacuation routes, emergency equipment or exit marking for employees during power outages

FLOOR MARKING

- ✓ No fumes
- ✓ No time needed to dry
- ✓ No spills
- ✓ Only cleaning the floor required
- ✓ Minimal required accessories
- ✓ Application does not usually interrupt work
- ✓ Conforms to uneven surfaces such as concrete, asphalt, brick and tile
- ✓ Can be easily removed
- ✓ Quickly applied for temporary conditions, like a liquid spill

PAINT

- ✗ Fumes require ventilation, the wearing of PPE and possible facility shutdown
- ✗ Needs time to dry
- ✗ Spills likely
- ✗ Extensive preparation time
- ✗ May require brushes and/or rollers, taping, drop cloths, etc.
- ✗ Application will usually disrupt work for extended period
- ✗ Uneven surfaces may require treatment to make surfaces smooth enough to paint
- ✗ Requires harsh chemicals or abrasive machines for removal
- ✗ Not designed for quick application

PROFESSIONAL IDENTIFICATION

Machine identification labels

Our High-Tack vinyl is ideal for difficult surfaces such as greasy surfaces, powder coated materials, dirt-repellent plastics etc. We also have materials that can withstand low or high temperatures.

Asset Identification

1. Track Equipment
2. Stock management
3. Prevent loss or theft as much as possible
4. MRO (maintenance-repair-operations) information

Print a unique QR barcode on your asset label so that the engineer can scan it with a laptop or tablet and make a direct online connection with the maintenance software. These barcodes can, of course, also be printed as separate asset labels so that, for example, during maintenance stops, all machine and installation parts can be viewed quickly.

CE-marking on machines

You are importing machines from Asia, but after your modification the original type plates no longer contain the correct technical data and safety symbols required by the CE directives in the EU.

With our nameplate printer you can easily design and print your personalized nameplate with CE marking on high quality tape materials. Our labelling software also has all NEN-7010 safety symbols that can be made with the same printer in the correct language in combination with your specific instruction.

Tampered Polyester

For fraud-sensitive equipment and products, we advise you to print on our VOID tape, which captures all important data in a fraud-proof label. With this label you seal the access to the equipment.

Permanent identification

Part of these guidelines is the introduction of rules on product identification, applicable to all manufacturers, importers and distributors of medical devices

This traceability requirement requires a high quality label that is scratch resistant, very difficult to remove, and should be UV resistant for years. You can easily meet these requirements by providing your structural parts with our hightack polyester tapes.

Removeable or repositionable

With our printer you have the possibility to print directly on magnetic film and you can create your own magnetic labels in no time.

But magnetic tape is no longer the only option because with the M300 or R300 removable vinyl series you can easily remove and even reuse your warehouse labels without any glue residue. Our T300 tag materials are pre-eminently the solutions as plug-in cards for Datastrips & Kanban bins.

Location and Shelf Labels

Create your own visual location identification labels.

You can decide length, height and content for yourself or use one of our many ready-to-use templates. Optimal user-friendliness thanks to smart variables and/or linking to a database/WMS system. Efficient and cost-saving ways to set up your Warehouse, or for every modification a corresponding location label immediately at hand.

Technical warehouse

A technical warehouse is incredibly dynamic, a printer that can move with this dynamic is a real godsend! Printing kanban location labels and Shelf location labels on all kinds of different formats.

Make use of our magnetic foil or removable vinyl solutions and move your label with the product to the new location. In addition, there are numerous solutions for product identification by means of a durable label or TAG, revision status and instructions etc..

Warehouse signing

Warehouse signs help visualize all processes within your location. We can offer you numerous solutions for location signs with long-range and retroreflective options. But also your internal signage and signs for e.g., loading & unloading docks, aisles, walking routes, BIN locations, pallet locations Lean 5S & safety visualization are among the possibilities.

Unique floor barcodes

Our floor barcodes create a clear and sharp image for your scanners and contribute to a better understanding of the work environment. This combined with the durability you are accustomed to from our products, makes it an ideal long term solution.

MARKING for Mechanical Engineering
Bodywork construction – Production
*Machine plates, Serial plates, UL and CE marking
inspection labels and calibration stickers*

MARKING for Wire and cable coding
A cable or wire that has a highly visible

CE-marking
On machines

With our nameplate printer you can easily design and print your personalized nameplate with CE marking on high quality tape materials. Our labelling software also has all NEN-7010 safety symbols that can be made with the same printer in the correct language in combination with your specific instruction.

Void Polyester
Prevent warranty fraud

For fraud-sensitive equipment and products, we advise you to print on our VOID tape, which captures all important data in a fraud-proof label. With this ! I, this will leave the text VOID and the label will not be usable again. It is then clearly visible that the equipment has been tampered with and you can prove that the warranty claim is not valid.

CE-marking (EN-1090-1)
For steel constructions

This measure imposes high requirements on the traceability of construction elements.

This traceability requirement requires a high quality label that is scratch resistant, very difficult to remove, and should be UV resistant for years.

Cable tags
Alternative to engraved resopal plates

APEX offers a wide range of cable tags for many applications.

The cable tags are available in various sizes and colors. Attaching the cable tags to the wire or cable is done by means of tie-wraps.

UL-marking
On export items

Design your personalised nameplates and print them on our UL-certified white and aluminium polyester tapes.

Shrink tubes
Cable sleeves

Our shrink tube materials are made of halogen free, flame retardant and low smoke heat shrinkable polyolefin tubing with ideal printability properties for identification purposes.

Rating plates
For Refrigeration and Cooling Installations

A part of the PED mandatory certification is that on all supplied refrigeration and cooling systems a license plate is mandatorily affixed on which the technical specifications and filling data are stated and, if necessary, an instruction card is placed.

Wire Wraps
wrap-around labels

Transparent wire-wraps, also known as wrap-around labels, provide a tight-fitting, self-laminating protective layer that is resistant to oil, water and solvents. This keeps your cable markers well protected under the most extreme conditions.

Machine plate a 1D or 2D QR-code
Customize

Service technicians and engineers would like to have a quick insight into the maintenance data of the installation in case of malfunctions and maintenance. These barcodes can, of course, also be printed as separate asset labels so that, for example, during maintenance stops,

Flag labels
On Cable

You can print your professional flag labels efficiently and quickly with our systems. Our high-adhesive tapes are available in a wide variety of colours and qualities ranging from 10mm to 100mm wide. From a few copies to high numbers, e.g. when setting up a network or switch cabinet, our printers and materials perform under all circumstances.

Safety signs and symbols are easily recognizable graphic labels that represent the general protocol and safety instructions in either workplaces, establishments, or public spaces. The appearance of safety signs and symbols can sometimes vary depending on the country or region, but their general goal is to communicate safety information which transcends language barriers and can be interpreted globally.

From one off safety signs, in multi-colour, through to unique and varied die-cut machine labels

Supplies for Every Application

Fabricated Signages

3D Signage, Acrylic Signage, Backlit Signage, Company Signage LED Signage, Lightbox Signage, Metal Signage, Neon Signage Outdoor Signage, Way find Sign, Channel Letters
